

Cake Wallet has integrated the Zano ecosystem

Mr_Kwibs

Feb 6, 2025 · 2 min read

The wait is finally over—**Zano has officially been integrated into Cake Wallet!** This is a giant leap forward for the Zano ecosystem, making it more accessible and user-friendly than ever.

What is Cake Wallet?

Cake Wallet is a popular, non-custodial cryptocurrency wallet designed primarily for Monero (XMR) but also supports other cryptocurrencies

like Bitcoin (BTC), Litecoin (LTC), and Bitcoin Cash (BCH). It allows users to store, send, receive, and exchange crypto while maintaining privacy and security, which aligns perfectly with Zano's values.

Key Features of Cake Wallet:

- **Private & Secure:** As a non-custodial wallet, users have complete control over their private keys.
- **Multi-Currency Support:** Supports Monero, Bitcoin, Litecoin, and now Zano as well.
- **Built-in Exchange:** Allows swapping between different cryptocurrencies.
- **Gift Cards:** You can buy gift cards with cryptocurrency, spending your crypto on goods and services around the globe.
- **Intuitive Interface:** Easy for both beginners and experienced users.
- **Open-Source:** The code is open-source, adding transparency and trustworthiness.
- **Available on Mobile:** iOS and Android apps are available.

Zano's Features in Cake Wallet

With this integration, Cake Wallet now supports native \$ZANO and Confidential Assets, allowing you to securely store and manage any asset launched within the Zano ecosystem.

If you import your existing Zano wallet using your seed phrase, and your wallet has an alias registered, you can now receive any Zano-based asset directly to your alias—seamlessly and securely.

One small note: Cake Wallet does not yet support alias registration, but we hope to see this feature added in the future!

Conclusion

This integration makes Cake Wallet the **first-ever** multi-functional wallet for Zano, providing users with an intuitive, secure, and privacy-focused way to manage their funds.

We're thankful for this collaboration with Cake Wallet's talented development team and excited to continue working together to bring even more functionality to the Zano and broader privacy community.

Try it out today, and let us know what you think!
